**Shiloh Industries Introduces the AcroStik™ Family of Acoustic Metal Laminates**

Valley City, OH, May 12, 2009 - Shiloh Industries, Inc. (NASDAQ: SHLO) is a major supplier of precision blanks, engineered welded blanks, complex stampings and modular assemblies for the automotive, heavy truck and other industrial markets. Production of AcroStik™ Acoustic Coil Laminate (ACL™) has been fully approved by a major automaker and successfully launched this year for a laminated steel oil pan for a V8 engine application.

Shiloh's proprietary process and adhesive technology has been developed in-house and represents a five-year project for the company. The viscoelastic chemistry can be tuned to provide damping for vehicle body and powertrain NVH applications. Shiloh's extensive knowledge of stamping and metal formability led the company's development objectives to achieve NVH performance requirements for laminated steel while improving formability. Patents are pending.

AcroStik™ ACL™ is available in coil sizes up to 72 inches wide and 60,000 pounds with composite thickness range from 0.031 to 0.079 inches.

Further developments are in process with several other OEMs.
